We can deliver our products to all over Iran and the world in the short time

Our Saffron PACKAGES

01 Sargol Saffron

Sargol Saffron Is Actually What Is In The Most People's Minds Of Saffron. In This Type, The Cream Part (Root) Was Completely Eliminated And The Red Stigmas Separately Form Pure Saffron.

02 Poshal Saffron

Pushal saffron is actually the red stigma of the saffron strand with 2 to 5 mm of yellow cream.

Saffron has different types, each of which has different color strength due to their different quality. In fact, the variety of saffron does not refer to the segmentation, place of production or packing company or variety of saffron cultivation, this only refers to the red and yellow sections of the saffron strands.

Real Picture

Real picture of our products which are exported to around the world that show the quality of our saffron.
